

COURIERplus – (Profile)

TrueBooks® Courier Management System “COURIERplus” is a custom designed Courier Management System, which caters to the automation of entire courier, messenger, expediting and distribution industries. “COURIERplus” is a Windows-based solution which automates the front office, back-end business and in-field courier processes such as online customer order entry, inbound and outbound airway bills, delivery run sheets, accounts receivable and real-time courier tracking.

“COURIERplus” is “robust, scalable and flexible” and would definitely leverage Your esteemed business to “Maximise Return On Investment”. It is designed to full fill the requirements of the time-sensitive delivery industry.

The web-enabled interface allows the user to login from anywhere in the world, and track their courier and also view the customer rate chart. The system is designed to integrate with Financial Accounting, to eliminate duplication of data entry and is also scalable to grow along with your company. The system is built with very user-friendly screens and is rich in functionality and features and maintains a high level of data integrity.

TrueBooks® Courier Management System can be deployed both in a single user or a multi-user environment. The system is built around very flexible RDBMS technology and can work with Microsoft SQL Server or ORACLE as the database.

PRODUCT FEATURES

- Setup of Zone
- Setup of Location
- Setup of Country & Currency
- Setup of employees
- Currency rate updating
- Processing Inbound and Outbound Airway bills
- Facility to scan the Inbound and Outbound Airway bills
- Processing of International and Domestic Couriers

The complete web-enabled interface allows the user to login to the site in order to select and track the parcel from anywhere. Customer Rate charts can also be uploaded to the site, where the customers can view the charts. The user will have a facility to update these charts periodically.

Security Implementation

- User profile setup (creating master details of each user)
- User group permission setup (assigning privileges)
- User group management (modifying the existing privileges)
- User password maintenance (modifying and resetting passwords)

General Features

- Data entry with minimum keystrokes
- Uncomplicated and menu driven screens
- Standard pattern of operation for all screens
- Accessibility of items using both Keyboard and mouse
- Comprehensive Search facility
- Online help to ensure operational efficiency

Printer setup

Dot-matrix, Inkjet and Laser

Additional Options available in the system upon request: -

Data Import / Export

Interoperability with existing systems and databases

Short Messaging Service (SMS)

System Requirements

Software:

Production Servers:

Windows 2000 Server or Advanced Server, Windows 2003 Server Or Greater (We do not recommend that XP be used as a server)

SQL Server 2005, or SQL Server 2005 Express with the SQL Server Management Studio Express

Client Machines:

No special hardware requirements for the client's machine. If the system can run MS office application without problems then it should work fine with TrueBooks applications.. A Local Area Network Connection and a fast Internet Connection is recommended. Client machines will require minimum 5GB hard drive space for the application to run smoothly.

Your TRUE Business Partner

Hardware:

Production Server:

Pentium IV Systems 1ghz + with at least 1GB Ram, 200MB for the Applications

Disk Space (estimated):

At least 5MB for application, 50MB for the starting database, but leave yourself room to grow depending upon your transaction volume.
